

CirrusHQ audit and secure Claim Technology's best-in-class Insurtech with AWS Well-Architected Framework

About Claim Technology

Claim Technology is an award winning Insurtech technology provider to simplify access into a wealth of insurtech services. Claim Technology has created over 50 best-in-class Insurtech capability providers available through one single connection for their customers using the AWS platform. They have been industry award finalists 15 times and winner of the Technology Innovation of the Year award.

The Challenge

Whilst Claim Technology applications are user-friendly, the backend architecture and AWS infrastructure was complex. Claim Technology wanted to optimise their application performance, security and cost by ensuring it followed AWS latest best practices - as part of their evolution and drive to maintain the highest standards.

The Solution

Claim Technology requested a series of AWS Well-Architected Reviews by CirrusHQ, of their workloads to optimise their Cloud platform.

The review and agreed actions gave Claim Technology the knowledge to make step changes on their complex infrastructure to provide the greatest benefits. Many identified highest priority tasks were remediated as part of the review, providing greater performance and reduced latency of content distribution as well as additional cost savings.

The Benefits

Improved content distribution

CloudFront enabled greater performance and reduced latency.

Optimised production environment

Improved architecture aligned to support business growth.

Increased security

More performant, robust and future proofed security.

About APN Partner CirrusHQ and Amazon Web Services

Claim Technology contacted CirrusHQ via the AWS Partner finder tool when searching for a Well-Architected Framework partner. CirrusHQ's undertakes 100s of Well-Architected reviews per year to help organisations build and operate secure, high-performing, resilient, and efficient infrastructure for applications - to help organisations find opportunities for significant cost savings, improved application performance, and reduced security risks. This rigorous approach has earned CirrusHQ high levels of customer satisfaction feedback and recognition from AWS.

Next Steps

“ Utilising an AWS Partner meant that we brought in lots of experience that could be instructed to manage the project from an architecture perspective which was a great relief for Claim Technology's in-house development team. ”
